Subject: RE: Lowerline radium situation

The daycare is run out of a house and we're checking to see if it's a licensed day care. Could be a babysitter with several kids.

Hi Greg,

We handed out the attached flyer when we did Phase 1 in December 2018. We distributed a flyer to each of the houses. There wasn't anyone at the church but there was someone at the daycare. No one expressed concern.

Thanks for being on the call yesterday, it really helped to understand the situation.

It looks like we are moving to get involved. I'll have questions as it goes along and will need some of the data from the contractors and such. Right now, my bosses have one urgent issue about the community communication or relations at the site. Have the nearby residents been informed of what is going on? What type of communication and has there been a lot of concern expressed by the community? Thank you in advance.
